

## Revitalize your Energy

Tonic for Increased Vitality

Rediscover your vital energy over days, weeks and months! **Miviton** is unsurpassed as an **immune-strengthening**, fortifying tonic to support both the immune system and the nervous system. This tonic works to **combat fatigue** and **harmonize moods** for a profoundly revitalized feeling.

**Miviton** is a super-food composed of quality ingredients that have been carefully selected and judiciously balanced to achieve optimal natural proportions (proteins, zinc, phosphorus, vitamin C). **Miviton** has **anti-anemic effects** (vitamin B12, micronutrients), **dynamizing effects** (organic phosphorus), **anti-rachitis effects** (bioavailable phosphorus, calcium), **psycho-tonic effects** (glutamic acid) and stimulating effects on the appetite (amino acids, trace micronutrients). This tonic is an outstanding protector that can fulfill the multiple unmet needs of your overworked body and brain!

**Miviton** can be taken regularly over long periods of time without ever overloading the system. It can be taken at the same time as any other conventional medications. Miviton is effective for rebuilding and regenerating the body, thanks to its optimal nutritional qualities and high bioavailability.

### Multiple Beneficial Components

**Wild herring roe** (sustainably harvested, North Atlantic) is to the ocean what pollen is to the plant kingdom:

- A true natural concentrate of essential amino acids, B-group vitamins and phosphorus, all indispensable factors to **support healthy nerve cell function**.
- Containing high concentrations of proteins (74% to 95%), and rich in peptides, free amino acids (85%), minerals and vitamins, this natural substance is of great interest for therapeutic use.
- Effective for **rebuilding and regenerating** the body's cells, featuring very high nutritional value and bioavailability, enhanced through an enzymatic process (hydrolysate formula).

**Zinc** (zinc citrate, highly bioavailable) participates in the wound-healing process, in skin conditions, in **preventing colds and flu** and in **protecting from the toxic effects** of free radicals. Zinc also plays a role in regulating mood and supporting cognitive function during learning.

### Recommended by Professionals

- Deep physical and mental fatigue
- Convalescence after surgery
- Childbirth, post-partum
- Fortifying tonic to rebuild and revitalize
- Mononucleosis, anemia, anorexia
- Advanced age (malnourishment, loss of appetite)
- Seasonal tonic, recovering from a cold or the flu
- Mood swings (irritability, depressive feelings)
- Memory and concentration
- Lack of energy, overwork
- Support for the growing adolescent
- Sleep disorder

### Direction

Take 10 ml, 1 to 3 times per day. Can be mixed with fruit juice (our favorite: pear nectar), or with pureed fruit or even added to a breakfast smoothie.

### Precautions

Do not take if you are pregnant, breastfeeding or if you are allergic to fish or seafood.

***Holizen** reminds you that it is always preferable to consult your health professional or a natural health therapist who will consider all the information relating to your state of health.*
