

Natural Pain Relief

Joint Pain & Rheumatism

Dissurol is a remarkable **anti-inflammatory and remineralizing agent**. Its formula was designed to specifically target various skin conditions (eczema, urticaria, rash) as well as joint, muscle or bone conditions (arthritis, osteoarthritis, rheumatism, fibromyalgia).

Benefits of Plant Extracts

Devil's Claw is an anti-inflammatory agent, a natural pain reliever that protects joint cartilage and promotes the elimination of uric acid, which is at the root of certain inflammatory processes (gout). Its anti-inflammatory effects are fast-acting, with maximum effect usually seen after 3 weeks of treatment.

Common Figwort is well-known for its detoxifying properties. It acts as a stimulant, decongestant and cleansing agent for the lymphatic system and it also relieves pain.

The addition of **nettle** makes this product ideal for rheumatism; it also exerts a remineralizing effect on worn cartilage. The scopoletin extracted from the flowers and roots of the nettle plant confer anti-inflammatory properties.

The powerful anti-oxidative effects of **turmeric** play a major role in this compound's anti-inflammatory effect. Its calming effects are felt from the very start of treatment and last over long periods.

Black-currant has long been used in herbal medicine as a diuretic, in cases of high uric acid levels and to relieve joint problems.

Recommended by Professionals

- Arthritis and osteoarthritis
- Rheumatism
- Joint stiffness and inflammation
- Gout (excess of uric acid)

Recommended Dosage

Take 10 ml, 1 to 3 times per day.

Warning

- Do not take if you are pregnant or breastfeeding
- Consult a health practitioner before using this product if you have heart disease, gallstones or bile duct obstruction, if you have stomach ulcers or an excess of gastric acid, or if you are taking an antiplatelet agent and/or anticoagulant medication.

Holizen reminds you that it is always preferable to consult your health professional or a natural health therapist who will consider all the information relating to your state of health.
